

FOR IMMEDIATE RELEASE:

## **Source One Expands Contract Sourcing Consultant Placement Program**

*Willow Grove, PA – 21 September 2011* -Source One has seen a dramatic increase in demand for sourcing and procurement consultant placement services in recent months. While demand for Source One's core comprehensive strategic sourcing services remains very strong, many companies have expressed an interest for full time sourcing consultants that can work on-site to accomplish specific short- and long-term strategic sourcing projects.

To facilitate this increased demand for specialized strategic sourcing consultants, Source One has added resources to its contract sourcing consultant placement service. The company has numerous highly qualified sourcing professionals in its roster, ready to engage with companies on specialized sourcing and procurement projects, with more high-caliber professionals being added on a continual basis.

The company has also recently enhanced its website to make the contract sourcing consulting offering more prominent. Visitors can view the new webpage and the details of the service at [http://www.sourceoneinc.com/temporary\\_procurement\\_resources.html](http://www.sourceoneinc.com/temporary_procurement_resources.html).

"We are proud to be able to supplement our core comprehensive services with this expanded offering," said Steven Belli, CEO. "Many companies are not ready to take on the challenge of a full strategic sourcing review of their business, but have immediate and specific needs to complete a specialized project for one or more categories of spend. Our Contract Sourcing Consultant Program gets those companies the on-site help they need right away, with no major long-term commitments."

### **ABOUT SOURCE ONE MANAGEMENT SERVICES, LLC:**

Source One is the leading procurement service provider, supplementing client resources with professional procurement cost reduction, strategic sourcing services and spend management solutions since 1992. The company's strategic sourcing services help organizations reduce spend (their costs for direct and indirect products and services) and help reduce the overall cost of acquisition through the application of proven sourcing and purchasing strategies, best practices, people and technologies.
